Section:	6000 Instruction	Office Responsible:	Office of Curriculum and Instruction
Policy:	6110 Grading Policy		
Related Policies:	N/A	Administrative Procedures:	N/A

I. Purpose

Outline the manner in which grades are determined in the Smyrna School District.

II. Authority

Delaware Code, Title 14 § 155

III. Definitions

Grading: a process by which individual students are assessed to determine the extent to which each has achieved the instructional goals and objectives (learning targets and standards) of a course or area of study.

IV. Policy Statement

Philosophy

- a. The Smyrna School District Board of Education expects that grades assigned to students, based upon a professional evaluation of student performance in a particular course or area of study, are to be based solely upon predetermined student learning targets which are available to students and parents.
- b. A key purpose of grading is to assess student understanding in order to inform future learning and instruction.
- c. The Board of Education believes that a grade should never be construed as an end in itself.
- d. The Board of Education believes that evaluation of student progress in the form of grades must be objective, understandable to students and to parents, and communicate strengths and weaknesses of student performance.
- e. Final course grades will communicate the level of competency a student has achieved related to the knowledge and skills expected within a course or academic discipline.

Implementation

Regulations shall ensure that grading is consistent with this policy.
